Avoid Transportation Overcharges with a Freight Audit

Agent Info

Name: Emendate

Listing details

Reference Number: RF177544

Description:
A freight audit is a process where the auditor reviews and verifies its freight bills and invoices to ensure accuracy and compliance with agreed-upon rates and terms. This is an essential step in cost control and financial management for businesses that rely on transportation services to move their goods. Freight audits help identify overcharges, errors, and discrepancies in billing, which can lead to cost savings and improved efficiency. The Freight Auditor will - where needed - file disputes with the suppliers to correct the freight invoice.
